

EQUIPMENT SPECIFICATIONS

ELECTRICAL SUPPLY

The machine runs from a 230V 50HZ single-phase A.C. supply and is fitted with a 2m power cable terminated with a BS 1363 plug fused at 13A. This should be connected to a switched socket outlet installed to the latest version of the I.E.E. Wiring Regulations.

WATER SUPPLY

The machine should be situated within 1 metre of a drinking water supply from a rising main, terminated at a W.R.C. approved 15mm compression stoptap. This water supply should comply with current Irish water regulations.

Water pressure at the stoptap must be within the limits of 0.2-10 bar.

Pump Fill: If the machine is fitted with a 'Water Bottle Pump Kit', it can be connected to an external drinking water container.

Manual Fill: The machine may be filled manually by opening the front cover to expose the filling funnel. The tank has an average working capacity of 15 cups between refills.

Caution: This machine should not be used with artificially softened water.

Water Temperature Tank set to heat water to 95°C. In the cup water temperature will vary between 80-90°C depending on the temperature from the tank and the type of cup used - china/paper.

Time to heat 15 minutes maximum from cold.

SYSTEM INFORMATION

Capsule Bin Capacity: The capsule bin will hold up to thirty used capsules. Capacity can be increased by mounting the machine on a Kenco base cabinet. We recommend that the Singles brewer be fitted with a high-grade water filter when plumbed, to ensure that the optimum drink is dispensed. Water filters can be ordered as an optional extra and must be replaced every six months (Code 42898).

Kenco Large Singles Brewer
Hot drinks when and where you want.

Singles Brewer

If you're looking to offer the widest range of high quality hot beverages in the easiest way possible then this is the system for you. The Kenco® Singles Brewer dispenses freshly brewed roast and ground coffees, frothy cappuccinos, the finest leaf teas and creamy hot chocolates.

This contemporary tabletop system is easy to use and maintain which makes it ideal for Convenience Retail, office supply, meeting areas and company restaurants.

The NEW Kenco Singles Brewer can accommodate a larger cup (up to 12 oz) which will satisfy your customers demand for a taller drink.

The Benefits to You

- Larger cup size means higher rps's and higher profits per cup.
- Kenco branded to highlight premium quality drinks.
- Quality range of **12** hot drinks caters to all tastes.
- Sealed product capsule ensures portion control, freshness, consistent taste and no wastage.
- Hygienic and easy to clean.
- Choose manual or plumbed option.
- LCD display makes for easy operation and troubleshooting.
- Merchandising unit available. Vertical and horizontal capsule stands available.
- Range of stylish cabinets available.
- Flexibility of payment options to suit operating environment.
- Optional high grade water filter

The Choice is Yours.

Choose from our extensive range of quality drinks including Kenco Large Medium Roast, Kenco Sustainable Development, Lyons Tea and Suchard Hot Chocolate flavoured drink.

NEW LARGER CUP SIZE

With Kenco Singles every drink is freshly prepared and brewed to deliver great tasting, high quality drinks, time and time again. Each capsule has its own special filter system and contains just the right amount of coffee, tea or hot chocolate which is foil sealed for freshness. Simply inserting the intelligent capsule tells the system to select the perfect brewer settings to give you that freshly brewed taste in every individual drink.
